Cyrus Ngugi
Web Designer / Developer
Email: cmuiruringugi@gmail.com
Phone: +254 742918991

Professional Summary

I'm a passionate web developer with hands-on experience in both front-end and back-end development. I enjoy turning ideas into real websites and apps that people can actually use. I've worked with modern tools like React and Tailwind, and I also have experience using WordPress to build custom sites. During my time at Belva Digital and in freelance projects, I learned how to work with teams and meet real deadlines. I also enjoy graphic design and sometimes create posters and flyers using Photoshop.

Skills

- Languages: JavaScript, HTML, CSS, PHP, Java (basic)
- Frameworks: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
- Tools & Platforms: WordPress, Git, VS Code
- Design: Adobe Photoshop, UI/UX basics
- Other: SEO basics, Responsive design, Team collaboration

Experience

Web Developer - Belva Digital (May 2024 - September 2024)

- Helped build and update websites with the design and marketing teams
- Created interactive features using React
- Worked on WordPress themes and plugins
- Improved website speed and made sure things looked good on all browsers

Freelance Web Developer (Jan 2022 - Dec 2023)

- Built websites for small businesses and individuals
- Focused on simple, mobile-friendly, and SEO-ready designs
- Talked with clients directly to understand what they needed and delivered on time

Projects

Chuka TradeHub

A small online marketplace for Chuka University students to buy and
sell items. Tech Used: React, Node, Express, Tailwind CSS
Role: Helped build the main features and made sure the app looked good and worked smoothly

Church Website - Jesus Power and Life Ministry

A full church website with service info, events, blog, and
donation page. Tech Used: HTML, CSS, Tailwind,
WordPress
Role: Designed the layout, developed the pages, and set up WordPress for content updates

Guava Creative Website

A website for a creative agency with portfolio, testimonials, and contact form.
Tech Used: HTML, CSS, JavaScript, Bootstrap, PHP
Role: Built the full site from scratch and added custom PHP for simple dynamic features
